GREEN ROOFS Technician Training Program

2022-1-PL01-KA220-HED-000086828

Overview of the project

The Green Roofs Technician Training project, aims to develop an innovative training course, methodology and a new, multidisciplinary occupational profile, specialized in green roofs. The project will foster the employability, socio-educational and professional development of young graduates in construction engineering, landscape architecture, urban planning and related studies through the acquisition of skills needed for urban regeneration.

The project objectives are to:

- Exchange knowledge and best practices on urban regeneration through green roofs;
- Develop an innovative training course on green roofs;
- Provide work-based learning opportunities for young graduates in construction engineering, and similar fields;
- Foster employability, socio-educational and personal development for young graduates in construction engineering (and other similar professional profiles);

The project results are:

1. Green Roofs Training Course and Platform Development
2. Green Roofs Trainers' Handbook
3. Guidelines for Green Roofs Training

The Green Roofs Training project is addressed to:

- Students and young graduates in construction engineering
- Professors and trainers teaching in construction engineering and related courses
- Landscape architects, urban planners and similar professional profiles
- Business, SMEs, NGOs, public authorities and other organisations dealing with urban regeneration and specifically green roofs
- Urban gardeners, professionals and amateurs will benefit from new economic or volunteer engagement opportunities
- Socially excluded people and/or from disadvantaged backgrounds

The Project's Results

R1. Green Roofs Training Course and Platform Development

The partnership is currently working on the first project result; the Training Course and Platform Development. This result encompasses two components: (1) A training course on Green Roofs and (2) An e-learning environment.

FOCUS GROUP

7 FOCUS GROUPS ORGANISED BY THE PARTNERS

10 EXPERTS PER COUNTRY

To achieve both of them, the initial step, is about conducting a series of focus groups with experts involved in green roof industry. The aim of these discussions is to identify the training needs and the necessary skills the young graduates and trainees should have to become 'green roof technicians'. After the partners collect the focus group data, they will proceed to the development of the project training material.

ANCVGREENROOFS.PT
ASSOCIAÇÃO NACIONAL DE COBERTURAS VERDES

ANCV conducted an interview with specialists from Landlab and Neoturf Green Roofs as part of the progress in the 'Green Roofs' project.

The project titled 'Green Roofs' (<https://green-roofs.eu>) is a 3-year initiative funded by the Erasmus Coordinators (EC) program under Erasmus+ KA2. The coordination of this project is managed by Politechnika Slaska Poland Gliwice.

A consortium of partners, comprised of the Associação Nacional de Coberturas Verdes, Eurocrea Merchant Sri, Gospodarska Zbornica Slovenije, Klaipedos Valstybine Kolegija, European Association of Erasmus Coordinators, and Universitatea Dunarea De Jos Din Galati, is involved in this project. The central objective of the project is to develop a course and an innovative approach aiming to create a new highly specialized professional profile in the field of green roofs.

The main mission of the project is to boost the employability and socio-educational and professional progress of young graduates in fields such as construction engineering, landscape architecture, urban planning, and related areas.

The ANCV conducted an 'Interview with Green Roofs Specialists' featuring professionals from Landlab and Neoturf, as part of one of the stages in the development of the 'Green Roofs' project. Through individual questionnaires, the professionals shared their experiences and recommendations to assist in the creation and execution of projects involving Green Roofs.

INTERVIEW WITH SPECIALISTS IN GREEN ROOFS

The Meetings

2nd Online Meeting

The second consortium meeting was conducted online on August 2nd, 2023, aiming primarily to deliberate on the necessary tasks for WP2 and establish the associated timelines.

Project's Dissemination

The partnership is disseminating the project through their networks.
