

70 FILLED QUESTIONNAIRES

- ✓ All 7 partners organized local focus groups to develop a “training needs” grid with the necessary skills for young students to become “Green Roofs technicians”.
- ✓ The local focus groups were formed by local stakeholders and specialists from different fields.
- ✓ All questionnaire responses of the focus groups were used to create a competence map in order to develop a training course for Green Roofs technicians.

COMPETENCE MAP

- ✓ A document containing the learning objectives, the training methodology and the delivery method will be developed.
- ✓ A Competence Framework referring to level 5 of EQF and to the ECTS credit system will be described.

TRAINING COURSE

- 1 multidisciplinary and modular training course on Green Roofs will be developed according to the Training Plan and Competence Framework.
- The course will not only provide training on technical subjects, but will also have a strong social component which is essential for green roofs to become a social space for the community.
- The course will be organized in different modules including some important topics, such as: **Urban Ecology and "Citymaking"** and **Social Engagement**.

TRAINING COURSE – TRANSLATED INTO 7 LANGUAGES

All 5 modules of the Training course (**Urban Ecology, Design and project specifications of Green Roofs, Maintenance of Green Roofs, Technical Management Consulting on Green Roofs and "Citymaking" and Social Engagement**) will be translated in the languages of all 7 partners: Polish, Italian, Slovenian, Lithuanian, Greek, Romanian and Portuguese.
